### CYANOACRYLATE ADHESIVES (CA)

**"SUPER GLUE" USED ON ALL TYPES OF ROCKETS**

These industrial quality instant glues are strong, economical, and time saving. They will bond virtually anything, yet it only takes a drop to bond one square inch of material. It takes anywhere from 10 - 30 seconds to complete a full strength bond. Thin formula is used for perfectly mated joints. Gap filling is used where the joint is close but not exact. Accelerators are also available for "instant" bonds.

### MODEL AIRPLANE DOPE

Dope is used for painting directly onto prepared wood. Wood is prepared by applying primer, balsa fillercoat or sanding sealer to the surface and sanding to a smooth surface. Dope can also be applied directly to bare wood, but requires much more paint since the unprepared wood absorbs the dope. It is fast drying, light, and can be applied with a brush without leaving stroke marks. Note: All colors are glossy

**CELLFOAM 88**

New state of the art material!

Lighter than balsa and tougher than other foam sheets, Cellfoam 88 is an extruded closed cell Polystyrene used in craft, architectural, diorama, scenery and foamie applications. Cellfoam 88 has a consistent smooth flat surface with paper liners for flexibility. It accepts most paints and adhesives and can be cut with ordinary hobby and craft tools. Cellfoam 88's cell structure allows sanding.
